Christmas giving in Buea

Retrospective terms of reference | 22 December 2022 | ADA/2022/007

Why this project mattered

Christmas is a time when our Christian commitment to care for others takes practical form. Through this visit, we wanted to share food and seasonal gifts with children living in an orphanage and extend support to the adults caring for them. Our intention was to offer useful provisions and a sense of being remembered, through the time, money and effort our team and supporters gave.

Who and where

The project was a visit to Sima orphanage in Buea, Cameroon, on Thursday, 22 December 2022. Sima is the institution name remembered in our account. The companion completion report records 33 children, approximately 10 to 15 years old, and 3 adult caregivers. These figures describe the reported reach of the visit.

Purpose and scope

The intended support combined foodstuffs with seasonal gifts. The categories recalled for this visit are rice, cooking oil, other foodstuffs, Christmas clothing, shoes and slippers, and toys. Support also extended to caregivers. The focus was on practical provisions and seasonal gifts for the orphanage community.

How the work was organised

Our team arranged purchases and transport and brought the goods to the orphanage. The resources covered goods, travel to market for project purchases and withdrawal charges. Purchasing and delivery formed the practical work of the visit.

Resources and accountability

The reported project total is 360,000 FCFA: 330,000 for goods, 20,000 for transport and 10,000 for withdrawal. The completion report presents these reported totals and explains their basis. The report also includes a detailed reconstructed allocation by goods category, distinguished from these confirmed aggregate amounts and not independently verified.

Dignity and reflection

Our faith motivates our service; receiving assistance does not depend on joining prayer or worship. Children's names, identifying photographs and personal stories are not included. Our usual practice is to reflect together after a project on delivery, timing and improvements.

Document basis: Prepared some time after the project was carried out, using our account and available working files. This is a reconstruction of the project purpose and scope, not an original pre-event approval. Institutional details and reach are recalled; item quantities and individual allocations are not established.
