School supplies and encouragement

Wednesday, 16 February 2022 | Lycée de Buea | Buea, Cameroon

Project completion report and financial account

Buckets and utensils prepared for the school visit.

Why this visit mattered

We heard that the school's prayer or Bible club, which had existed before, needed encouragement. We chose to respond with our presence, Christian encouragement and practical gifts for the students. The visit brought together the time our team gave and the money entrusted to the project, so that our care was expressed in both words and useful materials.

What our team did

We visited the school in advance and obtained permission. On Wednesday, 16 February 2022, we met students in a classroom, prayed with them, read the Bible and encouraged them. We then gave the students the materials we had brought.

Practical support and encouragement

School visit • 16 February 2022 • Lycée de Buea

Useful materials for students

The supplies included school bags, exercise books, pens and mathematical sets, together with buckets and utensils. These were for the students. Quantities and recipient-by-recipient allocations are not recorded in the information available to us, so we do not describe identical kits or calculate a cost per child.

What was delivered and what changed

We can report the school visit, encouragement and distribution of the six material categories. A verified student count, improved school results and the revival of the club are not established in the information available to us.

The February cleanup that had been discussed did not take place. This did not cancel the donation visit.

Faith, care and accountability

Prayer, Bible reading and encouragement reflected our Christian purpose. Assistance was available whether or not a student joined in prayer or worship. We have kept children's names and identifying photographs out of the report.

Our general practice is to meet as a team after a project to discuss what went well, timing and improvements. We do not present that practice as a documented February debrief. The following financial page distinguishes funds reported as sent from recalled operating costs and amounts not established.

Reporting basis: Prepared some time after the project was carried out, using our team's account and available working files. This retrospective account is not an independently audited statement. The financial page explains which amounts are recalled or established.

Preparing the supplies

Detail of buckets prepared for the school visit.

Financial account

February 2022 | Amounts in FCFA (XAF)

Funding and recalled use

We sent 215,000 FCFA for the school visit. We recall a withdrawal cost of about 5,000 FCFA and transport of 10,000 to 15,000 FCFA, with the remainder used to purchase supplies. The transfer figure is our confirmed account; it has not been independently checked against a transfer record. It is not automatically the expenditure total.

Financial measure	Amount and basis
Funds sent	215,000 - confirmed in our account
Withdrawal	About 5,000 - recalled cost
Transport	10,000 to 15,000 - recalled range
Exact total expenditure	Not established
Balance remaining in our accounts	Not established

What the funds provided

School bags, exercise books, pens, mathematical sets, buckets and utensils were provided to the students. Individual purchase prices and quantities are not established. The detailed table on page 4 shows reconstructed category allocations, not verified payments or unit prices.

Understanding the balance

The transfer less recalled charges does not establish the actual purchase total or a closing balance. If transport was at the lower end of the recalled range, the difference cannot automatically be assigned to extra supplies or treated as a balance remaining in our accounts. No figure in this report is today's mobile-money balance.

Supporting records

Withdrawal refers to the cost of taking the project funds out as cash. No receipt-backed expenditure schedule was available for this report. Proposed category prices are not recorded here as payments. The account may be updated if further records or a more precise account become available. Recipient numbers do not establish identical packages or a standard cost per person.

Detailed financial allocation

February 2022 | Reconstructed allocation | Amounts in FCFA

The detailed schedule allocates the working total across the materials and operating costs discussed for this project. The figures are reconstructed allocations, not independently verified payments. No item quantities or unit prices have been inferred.

Category	FCFA	Basis
School bags	60,000	Reconstructed allocation
Exercise books	55,000	Reconstructed allocation
Buckets	25,000	Reconstructed allocation
Utensils	20,000	Reconstructed allocation
Pens	15,000	Reconstructed allocation
Mathematical sets	20,000	Reconstructed allocation
Goods subtotal	195,000	Reconstructed allocation
Transport	15,000	Recalled cost used in reconstruction
Withdrawal fees	5,000	Recalled cost used in reconstruction
Operating subtotal	20,000	Reconstruction
Total allocation	215,000	Working total, not verified payments

Transport uses the upper end of the recalled 10,000 to 15,000 FCFA range. Withdrawal uses 5,000 FCFA as a reconstruction of the recalled approximate charge. The table fully allocates the 215,000 FCFA transfer by construction; it does not establish actual expenditure or an exact balance remaining in our accounts. If transport was lower, the difference still needs reconciliation.

The detailed allocation does not establish identical packages or a standard cost per recipient. No figure represents the current balance across our accounts.
